

# Systemonic & Agilent Share Opportunity for Success

July 17, 2002

San Jose, California

## The Transparent Connectivity Company

- **Founded 1999, Systemonic is a wireless communication solutions provider that delivers complete silicon solutions that power wireless data, video and voice networks across standards around the world.**
- **Systemonic has developed a flexible, programmable platform that allows customers to bring wireless communications products, that support multiple and future standards, to market faster.**
- **Systemonic provides customers and partners with complete solutions that can switch between multiple wireless protocols: 802.11a, 802.11b, future 802.11 protocols as well as Europe’s HiperLAN2, Japan’s HiSWANa and others.**

## Jointly developing an 802.11a+b production test program

- IEEE-compliant ATE testing with OFDM modulation
- Excellent correlation to Systemonic's bench (EVM, Constellation, etc.)
- Provides lowest cost-of-test

## Agilent provides

- **True W-LAN chip performance verification:**
  - Wide bandwidth RF receiver
  - EVM transmit and receive measurement capability
- **Fast time to market increases market potential:**
  - Correlation from design to characterization to production
- **High throughput and yield reduces cost of test:**
  - New OFDM testing methodology reduces test times

**Systemonic is recognized as an 802.11a+b leader and by working with Agilent we can excel via:**

- **Dual analog and digital test equipment reduces test cycle times and enables Systemonic to get to market quicker**
- **Multi-functional Analog/Digital tester supports Systemonic’s multi-protocol A+B Solution**
- **Satisfied customers thanks to complete IEEE compliant testing**
- **More competitive unit pricing thanks to lower cost of test**
- **Large installed base lowers risk and reduces costs**

**Agilent’s 93000 RF Measurement Suite’s correlation to Systemonic’s test bench is **right on the money!****

**Agilent’s digital modulation algorithms decrease our time to market and increase our market potential.**
